ZEUSNET WHITEPAPER (VERSION 1.0.0.1)

Dated: 15th of April,2025

INTRODUCTION
ZeusNet – Defy the Gods, Redefine Play-to-Earn Gaming & Forge the Future of DeFi

Welcome to ZeusNet, a blockchain gaming ecosystem *(in the making)* for mobile first play-2to-earn*(P2E)* gaming where the mortal realm collides with the divine in an electrifying odyssey poised to rally billions around the world in a new era of gaming and a DeFi revolution that will establish a new real world order currency on a planetary scale!

At the heart of this revolution lies $ZNT, Zeus's divine coin, a currency of power forged through gamified mining, NFT mastery, and the unyielding spirit of a global community. ZeusNet isn't just a platform; it's a movement to empower mortals—starting with gamers, dreamers, and future leaders—to shape the future of decentralized finance (DeFi).

Here, you don't just play—you defy the Gods of Olympus, challenge the might of Zeus himself, and claim your stake in a celestial rebellion that if successful, will usher mankind in an era of eternal prosperity.

Built for mobile-first gaming, ZeusNet is designed to be the ultimate hub for third-party game developers to craft the next generation of P2E blockbuster titles. Under our new CEO's leadership, our team, a collective of low-profile yet world-class P2E experts who have advised some of the biggest names in crypto gaming, is steering Zeus on a course to blockchain glory.

Today, we unveil Arena of Zeus, the first of our in-house mini games where the odds of Zeus's thunder hitting your chosen numbers will either make or break your $ZNT balance!
But this is only the beginning. Our vision scales far beyond: ZeusNet is a call to developers worldwide to build blockbuster titles powered by $ZNT with our GODS omnipresent, creating a vibrant ecosystem where creativity ,innovation and mythology reign supreme.

$ZNT isn't just a coin—it's a real-world currency with the potential to transcend gaming, resonating with a new generation, particularly students, the future leaders of tomorrow. By blending Greek mythology with cutting-edge blockchain technology, ZeusNet invites you to join a divine rebellion, mine $ZNT, and battle for glory in a gamified universe where the stakes are nothing less than the future of DeFi itself. Are you ready to defy the Gods and forge your legacy?

PROBLEM

**THE CHALLENGES OF MOBILE-FIRST P2E GAMING**

The mobile gaming market, with over 3 billion players globally, is the future of gaming, yet existing blockchains like Ronin are not optimized for mobile-first experiences, limiting the reach of play-to-earn (P2E) games. These platforms often suffer from slow transaction speeds, high fees, and poor accessibility, creating a clunky user experience that frustrates players and hinders mass adoption. Additionally, they lack the scalability to handle large user bases, offer limited tools for developers to build mobile-first games, and fail to engage communities in a gamified, 2accessible way, leaving behind a void for a blockchain that can truly unlock the potential of mobile P2E gaming.

SOLUTION

ZEUSNET: A DIVINE SOLUTION FOR MOBILE-FIRST P2E GAMING

ZeusNet is a blockchain in the making for mobile first P2E gaming with a gamified ecosystem in which the legendary Gods of Olympus—Hera, Dionysus, Demetra, and Aphrodite—rebel against Zeus to aid mortals in a celestial heist- hoarding $ZNT behind Zeus's back and defying divine rule through NFT utility and community-building. ZeusNet, which started with its own TESTNET on day one, will evolve through a standard EVM, a custom EVM optimized for P2E gaming, and finally a native blockchain, becoming the ultimate platform for game developers, blessed by the gods with features like Godly NFT cards, high transaction speeds, low fees, and developer-friendly tools to power the future of P2E games.

THE ZEUSNET ECOSYSTEM
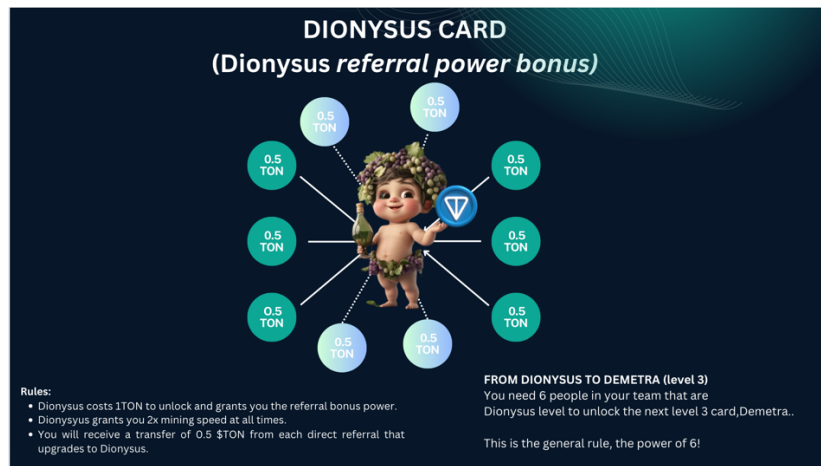

$ZNT COIN: A CELESTIAL HEIST ON ZEUS'S PROTOCHAIN

$ZNT, Zeus's divine coin, is the target of a mortal heist, aided by the gods' rebellion, reminiscent of Prometheus stealing fire. Currently, $ZNT operates on a protochain and cannot be transferred, but P2P transfers will be enabled at 100,000 Daily Active Users (DAU), as per the Roadmap. The goal is to hoard 300 million $ZNT, forcing Zeus to concede the coin is now mortals' legal tender on Earth and triggering the mainnet launch and ZNT's listing, ByBit is already onboard eagerly awaiting you to hit this magical number!
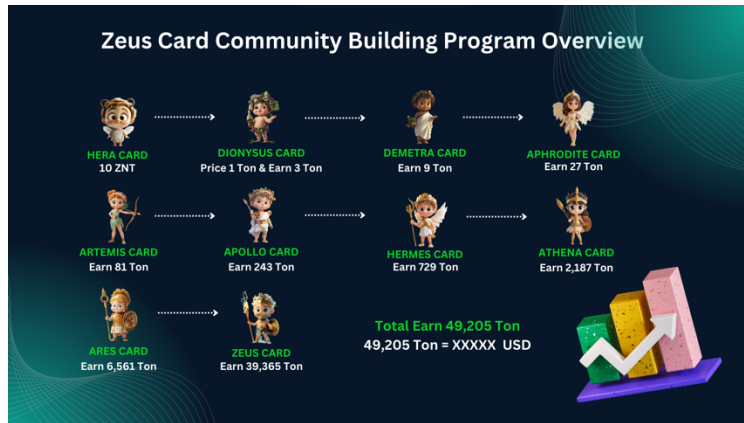

GODLY NFT CARDS: SUPERPOWERS TO DEFY ZEUS

Godly NFT cards grant mortals superpowers to mine $ZNT faster and prepare for the Battle of Zeus RPG. Available only in the Telegram mini app, these cards—starting with Hera, the Mother of the Divine Mining Alliance—can be purchased or earned, empowering users to ascend the divine ranks and challenge Zeus's control.

ZEUSCARD-TELEGRAM'S DIVINE ALLIANCE: BUILD AND EARN ON $TON

In a world's first, ZeusNet offers a Telegram-only NFT card community-building program consisting of 10 legendary Greek Gods on The Open Network (TON). Under Hera's guidance, mortals purchase the Dionysus card to form alliances, recruiting warriors to climb the Olympic ladder and earn $TON rewards. This gamified program fosters a divine community, driving growth as users ascend to the ultimate prize: Zeus's card.

DIONYSUS CARD
(Dionysus *referral power bonus*)

Rules:
- Dionysus costs 1TON to unlock and grants you the referral bonus power.
- Dionsyus grants you 2x mining speed at all times.
- You will receive a transfer of 0.5 $TON from each direct referral that upgrades to Dionysus.

FROM DIONYSUS TO DEMETRA (level 3)
You need 6 people in your team that are Dionysus level to unlock the next level 3 card, Demetra..

This is the general rule, the power of 6!

ZEUSNET MINING CONCEPT-#minelikeyouEAT

In our ZNT world, mining refers to any form of engagement within our ecosystem that rewards you with $ZNT coins. Currently there are three distinct 'mining channels' that define our #minelikeyouEAT concept, which elevates mining ZNT to the level of a biological/physiological need!

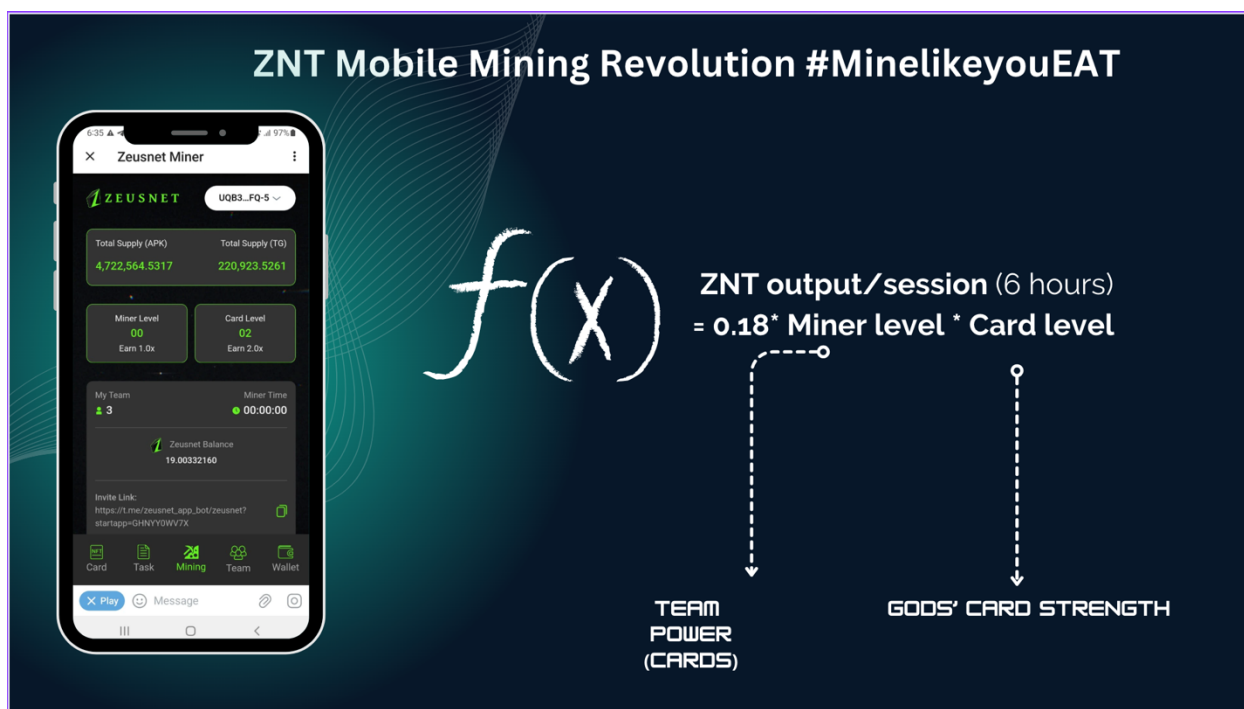

Play Game/s: we just released *Arena of Zeus*, a mini game in which you pick your lucky numbers and if Zeus's mighty thunder strikes them (all), you hit the jackpot and depending on the game you chose, you earn either $ZNT or USDT. To be fair, this mini game allows you to lose as well and just like when gambling, being too greedy will more often than not lead to the house winning. The odds are definitely in favor of the Gods!

NB: Spin Zeus is upcoming and will be updated in the next whitepaper.

Completing tasks: By completing tasks in our tasklist, users get rewarded with ZNT de facto mining. Plenty of social media and daily tasks to keep you coming back

Click to Mine: Mortals mine $ZNT every 6 hours u—encouraging users to mine as regularly as they eat under the hashtag #MineLikeYouEAT, a playful nod to the rhythm of daily meals.
This 6-hour counter, accessible via the Telegram mini app "ZeusNet Miner" for a full experience (mining, tasks, community) or the Android app for mining alone, keeps users engaged in the divine rebellion!

ZeusNet's mining process, gamified by the four rebel gods—Hera, Dionysus, Demetra, and Aphrodite—'competes' with mobile mining apps like Pi Network, Bee Network, and Mira Network. Unlike other apps, ZNT's click to mine system offers up to 4 mining sessions/day (6 hour each) as mining the divine $ZNT is literally elevated to the point of becoming a new biological need for ordinary mortals aspiring to unlock a prosperous future-hence the #minelikeyouEAT tagline.

ZeusNet's mining, enhanced by Godly NFT cards and a Telegram-based community program on TON, offers a divine adventure that engages users beyond mere token accumulation, positioning it as a leader in gamified crypto mining.

As can be seen from the formula above, mining output is strictly based on a user's NFT Gods card collection (highest level card) and on a user's miner alliance level (also determined by the cards).

The NFT card level is determined as follows:

GOD CARD	NFT LEVEL	MINER SPEED	UNLOCK MECHANISM	OTHER PERKS
HERA	1	1.1X	10 $ZNT	SOCIAL MEDIA WINS
DIONYSUS	2	2.0X	1$TON	SUPER $TON EARNINGS
DEMETRA	3	3.0X	TEAM BUILDING (6 DIONYSUS)	TBA
APHRODITE	4	4.0X	TEAM BUILDING (6 DEMETRA)	TBA

The highest booster coefficient is Aphrodite with a 4.0x,followed by Demetra 3.0x,Dionysus 2.0x and Hera 1.1x.

The miner alliance level has a maximum coefficient of 6.0x and literally counts how many Dionysus (NFT level two) direct referrals a user has in his miner alliance, using the following scheme:

Below 5: zero
6-10 miner level 1.0
11-15 miner level 1.5
16-20 miner level 2.0
….

*With an incremental 0.5x for every 5 new referrals that unlocked Dionysus.

A DIVINE EDGE OVER THE COMPETITION

ZeusNet's mobile-first design, integrated with Telegram's 900 million users, ensures seamless accessibility, while its mythological narrative and dual-utility NFT cards enhance engagement. High transaction speeds, low fees, and scalability—achieved through a phased blockchain evolution—address the pain points of platforms like Ronin, making ZeusNet the ultimate platform for mobile P2E gaming. The Battle of Zeus RPG, a cornerstone of our ecosystem, will be released in phases—an alpha version at 100,000 DAU and a more robust beta version later—ensuring a world-class gaming experience worthy of the gods.

A BLOCKCHAIN FOR MOBILE-FIRST P2E GAMING

ZeusNet aims to become the ultimate blockchain for mobile-first P2E gaming, competing with platforms like Coldware, Avive World, and Star Network. Coldware offers a mobile-first blockchain with Litenodes and a dApp Store that includes P2E gaming, focusing on decentralization and utility like DePin and PayFi. However, Coldware lacks the mythological narrative and gamified community engagement that ZeusNet provides through its rebel gods and Telegram program. Avive World, a Layer 2 metaverse project, supports social elements that could extend to gaming but misses ZeusNet's dedicated focus on P2E gaming and developer tools. Star Network, with its Social DeFi app, integrates mobile gaming but prioritizes social and financial features over a gaming-first ecosystem. ZeusNet's phased blockchain evolution—standard EVM at 1 million DAU, custom EVM at 3 million DAU, and native blockchain at 5 million DAU—ensures unparalleled scalability and performance for game developers, setting it apart as a divine platform for the future of P2E gaming.

NEW LEADERSHIP 2025- PETAR ASCENDS AS CEO WITH DeFi VISION

Launched in 2023 by its original founders, ZeusNet has grown over two years into a divine rebellion with over 200,000 miners on Android, but its early journey under previous management left the community feeling lost and disconnected. In 2025, Petar, not the original founder, has taken the helm as the new CEO, rebranding himself as ZeusNetBro—your brother in ZNT world.
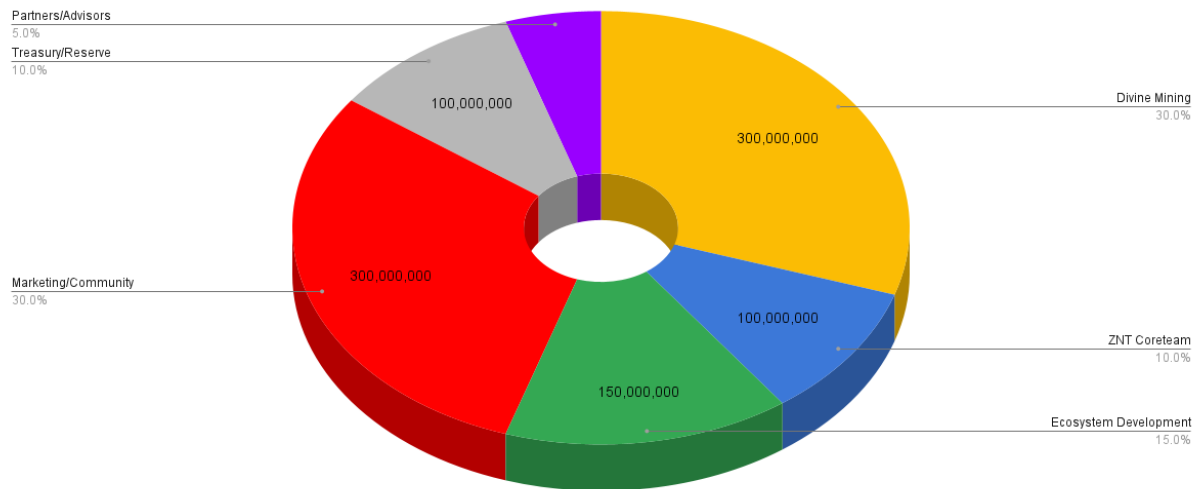

Petar has revitalized the project by gamifying the mining process, introducing the four rebel Gods—Hera, Dionysus, Demetra, and Aphrodite—to aid mortals in their celestial heist, making mining a divine adventure. He has also reconnected with the audience through regular livestreams and calls on ZeusNet's social media channels, forging a stronger bond with the community. This divine shift ensures that the voices of mortals are heard, guiding ZeusNet's path to becoming the ultimate platform for mobile-first P2E gaming and so much more, as the power of gaming to bring people from all over the world together is second to none, and it is precisely in this that lies the 'hidden' opportunity to launch a universal crypto payment solution that would at first appeal to specific demographic groups. Petar's focus on targeting students and on making ZNT a school subject- with a particular focus on crypto education -are the forces driving the ZeusNet Academy vision!

TOKENOMICS $ZNT: THE DIVINE COIN OF ZEUSNET

$ZNT, Zeus's divine coin, is the target of a celestial heist, aided by the gods' rebellion against him, reminiscent of Prometheus stealing fire for mortals. Operating on a protochain for now, $ZNT's ultimate goal is to power the future of crypto P2E games on ZeusNet's native blockchain, starting with Battle of Zeus and expanding to third-party developer games.

TOTAL SUPPLY AND DISTRIBUTION

Fixed supply of 1,000,000,000 $ZNT coins distributed to be distributed as follows:

Partners/Advisors
5.0%

Treasury/Reserve
10.0%

100,000,000

Divine Mining
30.0%

300,000,000

Marketing/Community
30.0%

300,000,000

150,000,000

100,000,000

ZNT Coreteam
10.0%

Ecosystem Development
15.0%

Mining (Community Rewards): 30% (300 million $ZNT)

Mortals mine $ZNT to challenge Zeus, aiming for 300 million $ZNT to claim victory and trigger the mainnet launch and ByBit listing. Only mined $ZNT counts toward this target. Transfers are currently disabled, but P2P transfers will be enabled at 100,000 DAU, as per the Roadmap.

ZNT CoreTeam: 10% (100 million $ZNT)

Rewards the architects of this rebellion, vested over 4 years to ensure their allegiance to the mortal cause.

Ecosystem Development: 15% (150 million $ZNT)

Fuels the creation of divine battlegrounds like the Battle of Zeus RPG and NFT marketplace, empowering mortals and developers with the tools to rise. Pre-listing, these coins drive growth, though they cannot be transferred until P2P transfers are enabled.

Marketing/Community Incentives: 30% (300 million $ZNT)

Ignites the rebellion through airdrops, daily tasks, partnerships, and events, rallying more mortals to join the cause. Pre-listing, $ZNT is credited to Telegram mini app balances for in-ecosystem use, but cannot be transferred until P2P transfers are enabled. These coins do not count toward the mining target.

Treasury/Reserve: 10% (100 million $ZNT)

A divine reserve for future battles, ensuring the rebellion endures. These coins do not count toward the mining target.

Advisors/Partners: 5% (50 million $ZNT)

Honors allies of ZNT, vested over 3 years. Pre-listing, these coins cannot be transferred until P2P transfers are enabled.

IMPACT OF THE 300 MILLION $ZNT MINING TARGET
When mortals mine 300 million $ZNT, Zeus as the God of Justice & Righteousness will concede that $ZNT belongs to mortals, ushering in the mainnet launch and ByBit listing. This victory will unlock $ZNT's full power, fuel liquidity, and pave the way for divine battles in the Battle of Zeus RPG and NFT marketplace.

POST-MAINNET ASCENSION
After the mainnet launch, mortals will govern their destiny through a divine council and rally the community to conquer Mt. Olympus, setting the stage for third-party developers to build on ZeusNet's native blockchain.

ZEUSNET ROADMAP: ASCENDING MT. OLYMPUS

ZeusNet's divine quest unfolds in majestic phases, each with a clear timeline to guide mortals toward ZNT glory. ZeusNet was born in 2023 and launched on day one with its own native TESTNET and PoT (Proof of Transfer) mechanism which required miners to send small amounts of $ZNT to other miners as a form of mining 'validation'.
The reception was overwhelming as it paved the way to a strong sense of community with numerous facebook and telegram groups for miners to exchange their addresses.

However, security glitches during the p2p transfer have led to malicious exploitation-hoarding of ZNT far beyond what Zeus is willing to allow! Moreover, the addition of NFT cards as

supermining powers to the aid of common mortals is a new concept that as such is still in its pilot version. Taken together, these considerations have prompted the need to put the TESTNET on hold for the time being.

PHASE 0: ZEUS'S PROTOCHAIN (TESTNET ON, ANDROID ONLY - Q1 2023 - Q2 2024)

Launch $ZNT with the Testnet on day one, igniting the celestial heist. Mortals rally to steal Zeus's $ZNT, driving over 100,000 Android downloads. Yet, P2P transfer glitches allow some to hoard vast troves of $ZNT, forcing Zeus to shut down the Testnet in divine frustration.

PHASE 1: RALLY TELEGRAM MORTALS (TESTNET OFF, Q3 2024 - Q2 2025)

With the Testnet offline, efforts turn to fortifying security and forging a mighty community on Telegram. A mini-app launches, uniting mortals in preparation for the next strike against the heavens.

PHASE 2: NEW CEO (Q1 2025 ONWARD)

Petar ascends as CEO in 2025, unveiling 'divine mining' through NFT cards and a mythological gamified narrative. He rekindles the community's fire with frequent livestreams, AMAs, and events.
Q1 2025 (Achieved): 20,000 DAU—20,000 mortals join the rebellion on Telegram.

PHASE 3: TARGET 100,000 DAU (ESTIMATED Q3 2025)

Relaunch the Testnet, restoring P2P $ZNT transfers. Unleash the alpha of Battle of Zeus, a simple RPG card-battle experience, to rally the community and harvest early feedback for the final game.

PHASE 4: EVM (TARGET 1 MILLION DAU - Q3 2026)

Achieve 1 million DAU by transitioning to an EVM-compatible blockchain, harnessing fast transactions and low costs to scale the rebellion. Release the beta of Battle of Zeus (tentative), a world-class RPG. Launch an NFT marketplace, establish a divine council for governance, and bestow mortals with new rewards.

PHASE 5: DEFY ZEUS (TARGET 300 MILLION COINS - ESTIMATED Q1 2026)

Mine 300 million $ZNT, claim victory, and launch the Mainnet. List on ByBit, cementing the mortals' triumph over Zeus in Q1 2026.

PHASE 6: REIGN SUPREME (Q2 2027)

Reach 3 million DAU. Upgrade to a custom EVM, optimized for mobile-first P2E gaming, delivering divine speed and efficiency while preserving EVM compatibility.

PHASE 7: THE DIVINE SUMMIT (Q4 2027)

Attain 5 million DAU. Launch ZeusNet's native blockchain, blessed by the gods as the ultimate platform for game developers. With high transaction speeds, low fees, and unmatched scalability, it powers the future of crypto P2E games by third-party creators, fulfilling ZeusNet's vision as the pinnacle of mobile-first gaming and slowly but surely paves the road to a DeFi revolution embraced by billions worldwide that eclipses any other coin on Earth to this date!
