

## INTRODUCTION

**ZeusNet –Blockchain network pioneering Learn-to-Earn thru mobile first GameFi. Defy the Financial Gods of Today thru blockchain education. Mine your destiny with our \$ZNT coin and Redefine P2E as the new Participate-to-Earn economy.**

Welcome to ZeusNet (ZNT), the learn-to-earn P2E pioneering blockchain network for all our heroes out there fighting for a decentralized new economy world order against the Financial Titans of today!

ZNT heralds a new P2E concept of ‘participate to earn’ that transcends gaming, starting with the mobile mining of our \$ZNT coin forged by the unyielding spirit of hundreds of thousands of L2E ‘heroes’ worldwide! Our heroes are warriors armed with decentralization knowledge and new player driven economic models, giving them the strength will to not bow to the Financial Gods of Today that are holding us back!

Inspired by the legendary tales of Greek mythology, ZeusNet is leading a mobile first participate-to-earn(*P2E*) cause where the mortal realm collides with the divine in an electrifying odyssey poised to rally billions around the world in a new era of blockchain education and a DeFi revolution that will establish \$ZNT as a new leading real world currency on a planetary scale!

ZeusNet isn’t just a platform; it’s a movement to empower ,educate and rally warriors against the centralized establishment holding them back—starting with students, dreamers, and future leaders.

### **NEW CEO’s Pivot- Learn2Earn and Participate2Earn Revolution**

ZeusNet has pivoted under the new CEO Petar to an entirely new concept of P2E–“Participate to Earn” which goes beyond gaming with a special focus on Learn2Earn (L2E) crypto education while retaining the legendary mythological character.

ZeusNet empowers students and learners from all walks of life to master blockchain fundamentals through engaging tasks, quests, and quizzes, transforming learning into a new form of mining. This is more than a platform—it’s a global movement to bridge the blockchain knowledge gap, rallying billions to shape a decentralized finance (DeFi) revolution and forge a new world currency on a planetary scale!

At the heart of ZeusNet pulses \$ZNT, Zeus’s divine coin, earned through gamified mining which soon will include immersive blockchain education.

With L2E, we’re pioneering a path for students worldwide to learn, earn, and lead—already sparking change through university events across Africa, Europe and beyond.

Let's defy the Gods of Modern Olympus and claim our stake in a celestial rebellion that if successful, will usher mankind in an era of eternal prosperity and make \$ZNT the most precious coin on Earth ever!

### **The Problem: A Knowledge Gap and a Centralized Stranglehold**

In a world where Financial GODS reign supreme, two towering barriers block humanity's path to true financial sovereignty: a crippling lack of blockchain education and the suffocating grip of centralized financial elites. ZeusNet, with its mobile-first Learn2Earn (L2E) and Participate2Earn (P2E) ecosystem, is the thunderbolt to shatter these chains, empowering billions to learn, participate, and lead through the power of their smartphones.

#### **1. The Blockchain Knowledge Gap: A Trillion-Dollar Opportunity for 3.8 Billion Smartphone Users**

Blockchain is revolutionizing finance, yet a vast knowledge gap keeps billions on the sidelines, unable to harness its power. Only about one-third of the global population understands the principles driving blockchain, with emerging economies like Pakistan (220 million people) facing acute digital literacy barriers. This gap is a \$1.76 trillion economic void—PwC projects blockchain could boost global GDP by this amount by 2030, with education and credential verification contributing \$574 billion. Yet, 100 million learners worldwide, capable of advanced study, will lack access to technological education by 2025 (World Economic Forum), perpetuating exclusion. ZeusNet's mobile-first Learn2Earn (L2E) model obliterates this barrier, delivering blockchain education through tasks, quests, and quizzes directly to your smartphone—learning on the go for the 3.8 billion smartphone users worldwide (Statista, 2025). With over 60% of internet traffic now mobile-driven, ZeusNet empowers students to mine \$ZNT while mastering blockchain, turning every smartphone into a gateway to the DeFi revolution.

#### **2. Escaping the Capricious Elites of Centralized Finance**

The centralized world order, ruled by financial elites, binds us to their whims—manipulating currencies, imposing high fees, and gatekeeping wealth. Central banks and systems like SWIFT drain billions through inefficiencies, as seen in the 2008 financial crisis and ongoing cryptocurrency regulations. The human toll is staggering: 1 billion people lack legal identity, and 2 billion remain unbanked, excluded from formal economies (World Bank, 2024). Blockchain's decentralized promise, like Ripple's cost-slashing transactions, threatens this control, yet elites resist change.

ZeusNet's \$ZNT, a divine coin forged by a global student community, breaks this stranglehold. Through Participate2Earn (P2E), we redefine earning—mining, completing tasks, playing games, and engaging in our ecosystem—freeing us from the capricious behavior of elites.

With 3.8 billion smartphones in hand, we're building a decentralized global economy where value is earned through participation, not dictated by centralized gatekeepers.

The blockchain knowledge gap and centralized financial tyranny are shackles on humanity's potential, but ZeusNet's mobile-first L2E and P2E ecosystem is the rebellion to end them. With \$ZNT university partnerships and educational events across Africa, Asia and Europe, we're igniting a global learn2earn movement poised to carve a significant dent in the future decentralized economy!

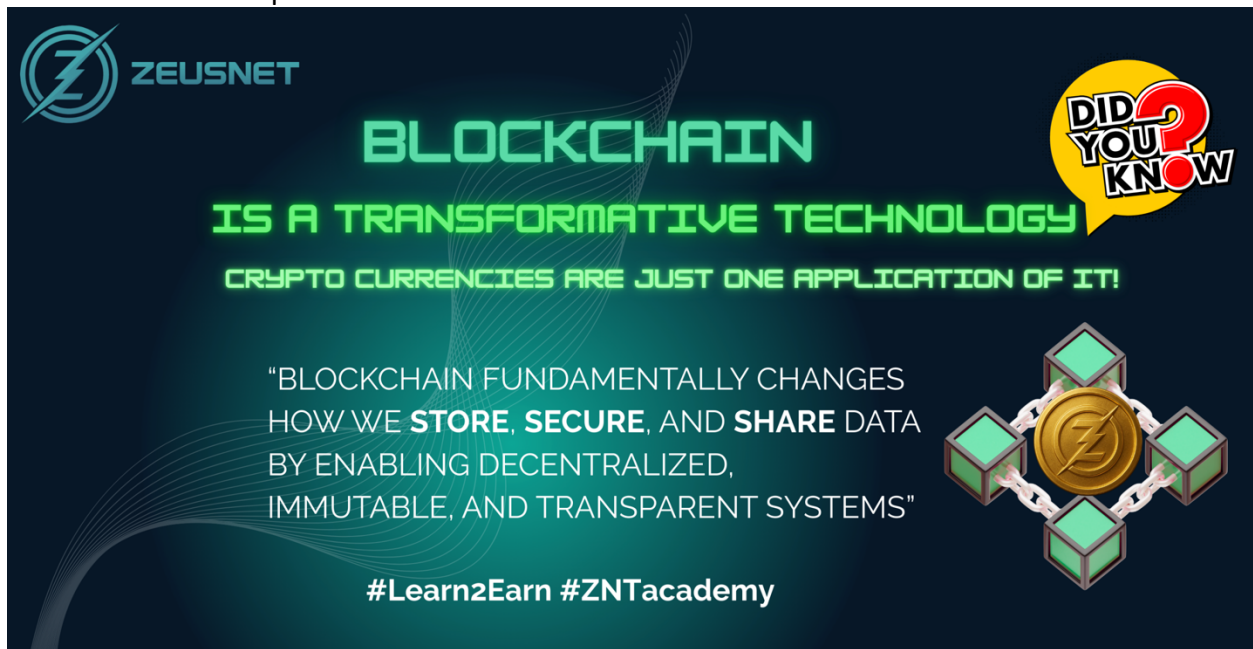

**Join us to bridge the \$1.76 trillion knowledge gap, empower 3.8 billion smartphone users, and overthrow the Financial GODS. With ZeusNet, your smartphone is your weapon to learn, participate, and forge a new world order!**

**THE SOLUTION:** ZeusNet is a learn2earn blockchain network with a P2E 'engine' propelled by the grit of hundreds of thousands of mobile miners around the world hungry for the knowledge to conquer in the new blockchain economy!

The fuel for this engine is the divine coin \$ZNT. Legend has it that it was forged by Zeus himself on a Protochain for Gods only, making it (virtually) impossible for humans to mine it efficiently on their own, without any divine intervention.

Luckily enough, there are four Olympian Gods willing to assist humans with their superpowers behind Zeus's back —Hera, Dionysus, Demetra, and Aphrodite- defying his divine rule through NFT superpowers ,community-building and educational posts.

Since L2E is a new pivot, most of the education now occurs thru livestreams with the CEO as well as social media posts.

A promotional graphic for ZeusNet. The background is dark blue with green wavy lines. In the top left is the ZeusNet logo, which consists of a stylized 'Z' with a lightning bolt inside a circle, followed by the text 'ZEUSNET'. In the center, the word 'BLOCKCHAIN' is written in large, bold, green capital letters. Below it, the text 'IS A TRANSFORMATIVE TECHNOLOGY' is written in smaller green capital letters. Further down, 'CRYPTO CURRENCIES ARE JUST ONE APPLICATION OF IT!' is written in even smaller green capital letters. A quote in white capital letters reads: "BLOCKCHAIN FUNDAMENTALLY CHANGES HOW WE **STORE, SECURE, AND SHARE** DATA BY ENABLING DECENTRALIZED, IMMUTABLE, AND TRANSPARENT SYSTEMS". At the bottom center, the hashtags '#Learn2Earn' and '#ZNTacademy' are displayed in white. In the top right corner, there is a yellow speech bubble with the text 'DID YOU KNOW?' in red and black. In the bottom right corner, there is a graphic of a gold coin with a lightning bolt symbol, surrounded by four green cubes connected by white chains.

At the time of writing, the learn2mine feature is still not present on our platforms.

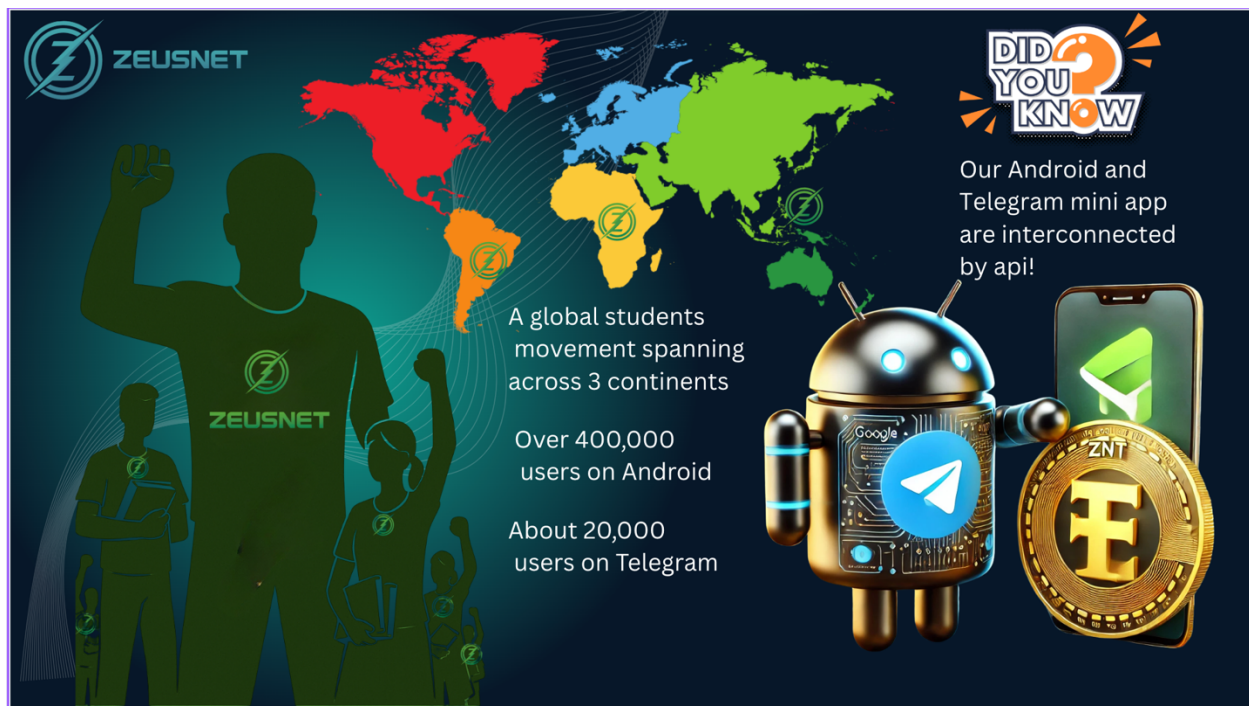

## ZEUSNET TECH INFRASTRUCTURE

**ZeusNet is a duosystem consisting of two platforms-Android and Telegram mini app.**

**The Android app was designed for mining ZNT the old fashioned way click2mine only, while the Telegram mini app was built for offering P2E more in general to Telegram's market.**

**It is worth noting that our team has pulled off something extraordinary here as our Android application is now API connected to our Telegram mini app thru a process called binding, ensuring that all mining activities are kept track off properly across both platforms.**

This achievement is a testament to the fact that no matter what obstacles come down our way, we shall overcome them and prevail!

## ZEUSNET BLOCKCHAIN: from Native to EVM?

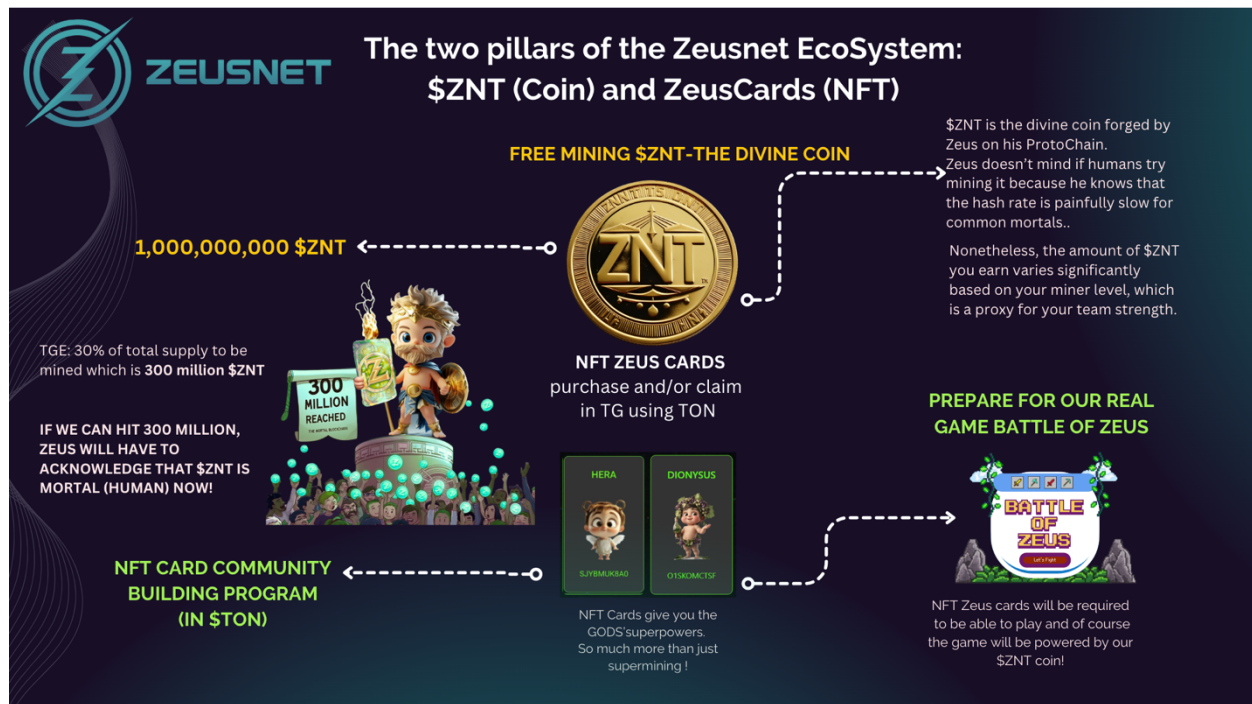

ZeusNet was born in 2023 and launched on day one with its own native TESTNET and PoT (Proof of Transfer) mechanism which required miners to send small amounts of \$ZNT to other miners as a form of mining 'validation'.

The reception was overwhelming as it paved the way to a strong sense of community with numerous facebook and telegram groups for miners to exchange their addresses.

However, security glitches during the p2p transfer have led to malicious exploitation-hoarding of ZNT far beyond what Zeus is willing to allow! In addition, ZNT pivoted into the direction of

learning and earning , a new concept that as such is still in its pilot version. Taken together, these considerations have prompted the need to put the TESTNET on hold for the time being and to consider shifting towards an EVM environment.

ZNT will most likely evolve through a standard EVM, a custom EVM optimized for P2E, and finally a native blockchain with features like Godly NFT cards, high transaction speeds, low fees, and developer-friendly tools to power the future of P2E and GameFi.

### **\$ZNT COIN: A CELESTIAL HEIST ON ZEUS'S PROTOCHAIN**

\$ZNT, Zeus's divine coin, is the target of a mortal heist, aided by the gods' rebellion, reminiscent of Prometheus stealing fire.

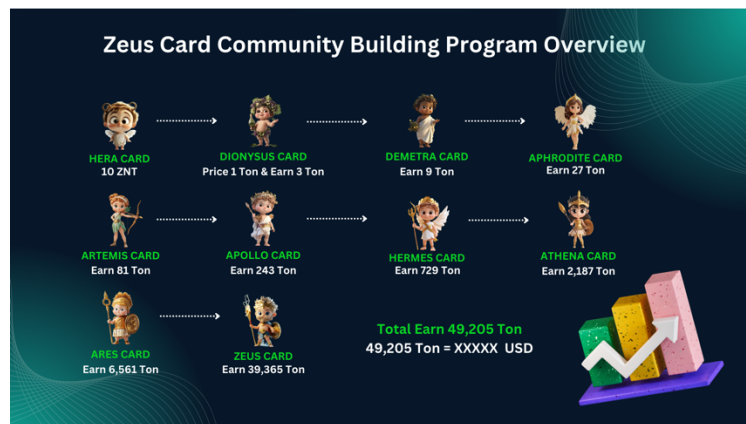

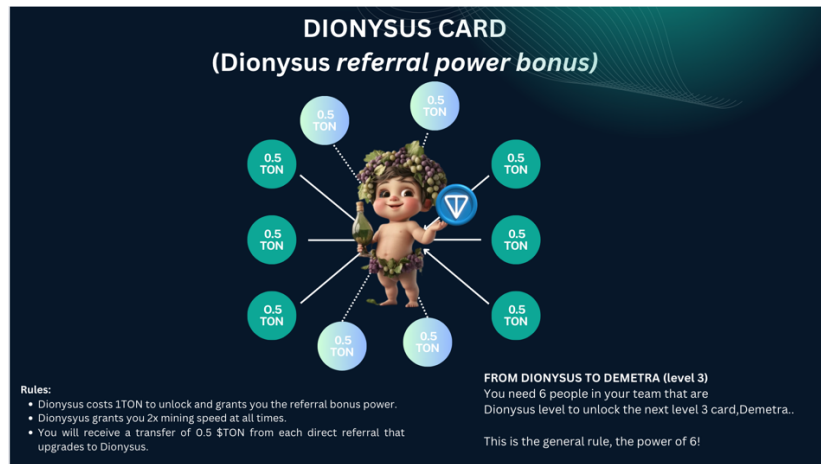

The goal is to hoard 300 million \$ZNT, forcing Zeus to concede the coin is now mortals' legal tender on Earth and triggering the mainnet launch and ZNT's listing. Our partner ByBit is already onboard eagerly awaiting you to hit this magical number!

### **GODLY NFT CARDS: SUPERPOWERS TO DEFY ZEUS**

Godly NFT cards grant mortals superpowers to mine \$ZNT faster and prepare for the Battle of Zeus RPG. Available only in the Telegram mini app, these cards—starting with Hera, the Mother of the Divine Mining Alliance—can be purchased or earned, empowering users to ascend the divine ranks and challenge Zeus's control.

## ZEUSCARD-TELEGRAM'S DIVINE ALLIANCE: BUILD AND EARN ON \$TON

In a world's first, ZeusNet offers a Telegram-only NFT card community-building program consisting of 10 legendary Greek Gods on The Open Network (TON). Under Hera's guidance, mortals purchase the Dionysus card to form alliances, recruiting warriors to climb the Olympic ladder and earn \$TON rewards. This gamified program fosters a divine community, driving growth as users ascend to the ultimate prize: Zeus's card.

## ZEUSNET MINING CONCEPT-#minelikeyouEAT

In our ZNT world, mining refers to any form of engagement within our ecosystem that rewards you with \$ZNT coins.

Unlike other mobile mining apps where all it takes is a click once a day, our mobile mining concept is multi dimensional, whereby click2mine is just one mode of mining.

Currently there are three distinct 'mining channels' that define our #minelikeyouEAT concept, which elevates mining ZNT to the level of a biological/physiological need!

**#PlaytoMine:** We just released Zeus Spin! Our brand new mini game built in house in which users always win \$ZNT (USDT version also available) simply by spinning the divine wheel.

*Arena of Zeus*, a mini game in which you pick your lucky numbers and if Zeus's mighty thunder strikes them (all), you hit the jackpot and depending on the game you chose, you earn either \$ZNT or USDT. To be fair, this mini game allows you to lose as well and just like when gambling, being too greedy will more often than not lead to the house winning. The odds are definitely in favor of the Gods!

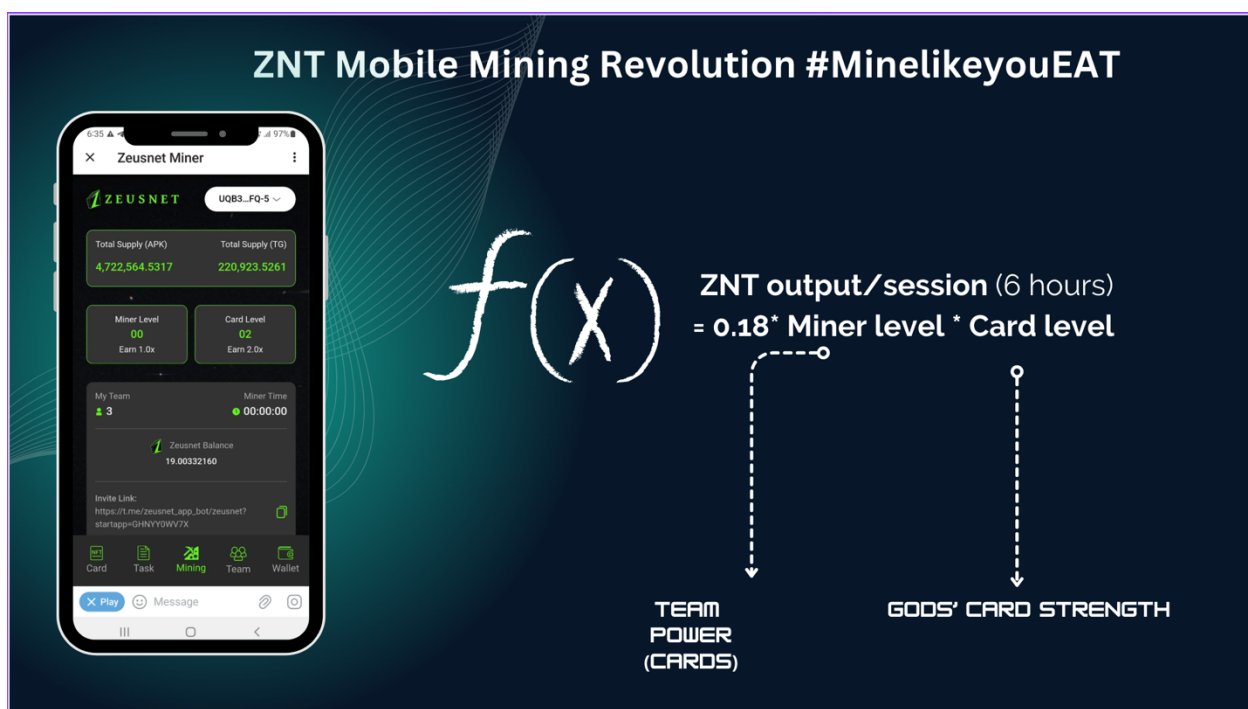

**#TasktoMine** (*completing tasks*) By completing tasks in our tasklist, users get rewarded with ZNT de facto mining. Plenty of social media and daily tasks to keep you coming back!

**#ClicktoMine:** Mortals mine \$ZNT every 6 hours u—encouraging users to mine as regularly as they eat under the hashtag #MineLikeYouEAT, a playful nod to the rhythm of daily meals. This 6-hour counter, accessible via the Telegram mini app "ZeusNet Miner" for a full experience (mining, tasks, community) or the Android app for mining alone, keeps users engaged in the divine rebellion!

ZeusNet's mining process, gamified by the four rebel gods—Hera, Dionysus, Demetra, and Aphrodite—'competes' with mobile mining apps like Pi Network, Bee Network, and Mira Network. Unlike other apps, ZNT's click to mine system offers up to 4 mining sessions/day (6 hour each) as mining the divine \$ZNT is literally elevated to the point of becoming a new biological need for ordinary mortals aspiring to unlock a prosperous future-hence the #minelikeyouEAT tagline.

NB: L2E #LearntoMine is being tested and will soon be deployed in our telegram mini app. Stay tuned for the next whitepaper update!

ZeusNet's mining, enhanced by Godly NFT cards and a Telegram-based community program on TON, offers a divine adventure that engages users beyond mere token accumulation, positioning it as a leader in gamified crypto mining.

As can be seen from the formula above, mining output is strictly based on a user's NFT Gods card collection (highest level card) and on a user's miner alliance level (also determined by the cards).

The NFT card level is determined as follows:

# THE GODS WILLING TO HELP BEHIND ZEUS'S BACK!

	GOD CARD	NFT LEVEL	MINER SPEED	UNLOCK MECHANISM	OTHER PERKS
	HERA	1	1.1X	10 \$ZNT	SOCIAL MEDIA WINS
	DIONYSUS	2	2.0X	1\$TON	SUPER \$TON EARNINGS
	DEMETRA	3	3.0X	TEAM BUILDING (6 DIONYSUS)	TBA
	APHRODITE	4	4.0X	TEAM BUILDING (6 DEMETRA)	TBA

The highest booster coefficient is Aphrodite with a 4.0x, followed by Demetra 3.0x, Dionysus 2.0x and Hera 1.1x.

The miner alliance level has a maximum coefficient of 6.0x and literally counts how many Dionysus (NFT level two) direct referrals a user has in his miner alliance, using the following scheme:

Below 5: zero

6-10 miner level 1.0

11-15 miner level 1.5

16-20 miner level 2.0

....

\*With an incremental 0.5x for every 5 new referrals that unlocked Dionysus.

## **The Competitive Landscape: A Crowded Pantheon, Yet No True Rival**

In a world where Financial GODS—modern Olympians—hoard power over wealth and knowledge, the blockchain revolution remains out of reach for billions, shackled by a profound lack of education and the tyranny of centralized finance. While others dabble in the Learn2Earn (L2E) and crypto-earning arenas, ZeusNet’s #learntomine initiative—fueled by our divine coin, \$ZNT—stands as a thunderbolt, forging a student-led rebellion to empower the masses. We don’t just compete; we redefine the battlefield, transforming crypto education into a powerful act of mining and participation that shatters barriers and claims destiny for 3.8 billion smartphone users worldwide.

### **The L2E and crypto-earning space is buzzing, but no one matches ZeusNet’s vision:**

**Coinbase Earn:** This giant offers L2E through videos and quizzes, rewarding users with \$1-\$6 in coins like Solana or NEAR, distributing over \$100 million since 2018 (Coinbase Blog, 2023). Yet, its generic approach lacks a mining narrative, student focus, or community events, and its KYC barriers exclude many in emerging markets.

**Binance Learn & Earn:** Similar to Coinbase, Binance pays up to \$10,000 per campaign for completing blockchain courses (Binance Announcements, 2024). It’s broad but not student-centric, tethered to centralized exchanges, and lacks the gamified mining ethos of #learntomine.

**Pi Network and Electroneum:** These mobile mining pioneers boast 50 million and 4 million users, respectively, with simple tap-to-mine apps (Pi Network, 2024; Electroneum Blog, 2023). Their educational content is minimal, failing to bridge the blockchain knowledge gap that ZeusNet targets.

**Blockchain Hackathons (ETHGlobal, Chainlink):** Developer-focused events like ETHGlobal’s 2024 hackathons attract 10,000+ participants with \$100,000 prizes (ETHGlobal Reports). They’re elite, not inclusive, leaving beginners and students behind.

**Educational Competitions:** Non-crypto platforms like the Biology Challenge engage thousands with gamified learning (RSC Education, 2023), but they lack blockchain’s transformative power or a currency like \$ZNT.

These players flirt with education or earning, but none wield the audacity of ZeusNet’s #learntomine—a movement that fuses learning, participation, and rebellion into a single, electrifying act of mining \$ZNT.

## **ZeusNet's Competitive Edge: Forging the Future with #learntomine**

ZeusNet doesn't just compete; it redefines empowerment through five divine advantages:

**Student-Led Revolution with Global Community:** Unlike Coinbase's broad audience, ZeusNet rallies students, with over 400,000 heroes already mining \$ZNT through university events in Africa and Croatia. Our offline workshops and competitions, like the ATBU University Mining Competition (300 million ZNT, March 2025), ignite real-world passion, building a global student army no competitor can match.

**Mobile-First Learning for 3.8 Billion:** Designed for "learning on the go," #learntomine delivers crypto education—articles, quizzes, tasks—directly to smartphones, tapping 3.8 billion users (Statista, 2025). While Pi Network simplifies mining, we enrich it with gamified L2E tasks, turning every phone into a forge for \$ZNT and knowledge.

**Education as Mining: A Divine Narrative:** #learntomine transforms learning into mining \$ZNT through tasks like reading "What is DeFi?" and passing randomized quizzes. Unlike Coinbase's fragmented coin rewards, \$ZNT unifies our ecosystem, fostering loyalty and fueling our decentralized dream.

**Defying Centralized Elites:** We reject the capricious Financial GODS ruling centralized systems, which exclude 2 billion unbanked and 1 billion without legal identity (World Bank, 2024). \$ZNT, earned through Participate2Earn (P2E) tasks—mining, quizzes, games—empowers users to build a new world order, unlike Coinbase's centralized exchange model.

**Localized Impact in Emerging Markets:** Our events in Africa and Croatia, with plans for more, reach underserved regions where digital literacy lags (e.g., Pakistan's 220 million).

### **The ZeusNet Advantage: A \$1.76 Trillion Destiny**

The blockchain knowledge gap—a \$1.76 trillion GDP opportunity by 2030 (PwC)—and centralized tyranny are humanity's shackles. ZeusNet's #learntomine breaks them, arming students with knowledge and \$ZNT to seize the \$574 billion education-driven blockchain market. Our gamified tasks, automated quizzes, and university events outshine competitors, turning 3.8 billion smartphones into weapons of rebellion. Join ZeusNet, mine your future, and storm Mount Olympus to claim financial sovereignty!

**NEW LEADERSHIP 2025- PETAR ASCENDS AS CEO WITH L2E DeFi PIVOT**

Launched in 2023 by its original founders, ZeusNet has grown over two years into a divine rebellion with over 400,000++ miners on Android and 20,000++ on Telegram but its early journey under previous management left the community feeling lost and disconnected. In January 2025, Petar, not the original founder, has taken the helm as the new CEO, rebranding himself as ZeusNetBro—your brother in ZNT world.

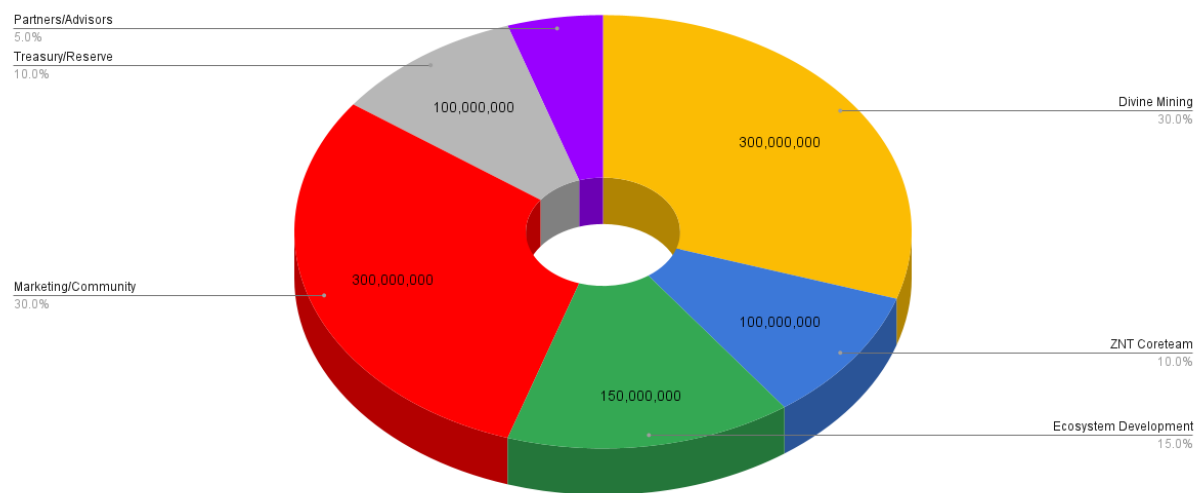

Petar has revitalized the project by gamifying the mining process, introducing the four rebel Gods—Hera, Dionysus, Demetra, and Aphrodite—to aid mortals in their celestial heist, making mining a divine adventure. He has also reconnected with the audience through regular livestreams and calls on ZeusNet's social media channels, forging a stronger bond with the community.. Petar’s focus on targeting students and on making ZNT a school subject- with a particular focus on crypto education -are the forces driving the ZeusNet Academy vision!

**TOKENOMICS \$ZNT: THE DIVINE COIN OF ZEUSNET**

\$ZNT, Zeus's divine coin, is the target of a celestial heist, aided by the gods' rebellion against him, reminiscent of Prometheus stealing fire for mortals. Operating on a protochain for now, \$ZNT's ultimate goal is to power the future of crypto P2E games on ZeusNet's native blockchain, starting with Battle of Zeus and expanding to third-party developer games.

**TOTAL SUPPLY AND DISTRIBUTION**

Fixed supply of 1,000,000,000 \$ZNT coins distributed to be distributed as follows:

Mining (Community Rewards): 30% (300 million \$ZNT)

Mortals mine \$ZNT to challenge Zeus, aiming for 300 million \$ZNT to claim victory and trigger the mainnet launch and ByBit listing. Only mined \$ZNT counts toward this target. Transfers are currently enabled for all those who passed KYC round I.

ZNT CoreTeam: 10% (100 million \$ZNT)

Rewards the architects of this rebellion, vested over 4 years to ensure their allegiance to the mortal cause.

Ecosystem Development: 15% (150 million \$ZNT)

Fuels the creation of divine battlegrounds like the Battle of Zeus RPG and NFT marketplace, empowering mortals and developers with the tools to rise. Pre-listing, these coins drive growth, though they cannot be transferred until P2P transfers are enabled.

Marketing/Community Incentives: 30% (300 million \$ZNT)

Ignites the rebellion through airdrops, daily tasks, partnerships, and events, rallying more mortals to join the cause. Pre-listing, \$ZNT is credited to Telegram mini app balances for in-ecosystem use, but cannot be transferred until P2P transfers are enabled. These coins do not count toward the mining target.

Treasury/Reserve: 10% (100 million \$ZNT)

A divine reserve for future battles, ensuring the rebellion endures. These coins do not count toward the mining target.

Advisors/Partners: 5% (50 million \$ZNT)

Honors allies of ZNT, vested over 3 years. Pre-listing, these coins cannot be transferred until P2P transfers are enabled.

### **IMPACT OF THE 300 MILLION \$ZNT MINING TARGET**

When mortals mine 300 million \$ZNT, Zeus as the God of Justice & Righteousness will concede that \$ZNT belongs to mortals, ushering in the mainnet launch and ByBit listing. This victory will unlock \$ZNT's full power, fuel liquidity, and pave the way for divine battles in the Battle of Zeus RPG and NFT marketplace.

## **POST-MAINNET ASCENSION**

After the mainnet launch, mortals will govern their destiny through a divine council and rally the community to conquer Mt. Olympus, setting the stage for third-party developers to build on ZeusNet's native blockchain.

## **ZEUSNET ROADMAP: ASCENDING MT. OLYMPUS**

ZeusNet's divine quest to overthrow the Financial GODS unfolds in majestic phases, forging a student-led revolution through #learntomine and #participatetoeearn. Under the bold leadership of new CEO Petar in 2025, we pivot to empower billions with Learn2Earn (L2E) and Participate2Earn (P2E), transforming crypto education and community action into a new way of mining \$ZNT. Wielding Godly NFT cards and learner-driven economies, mortals earn ZNT, USD

### **PHASE 0: ZEUS'S PROTOCHAIN (TESTNET ON, ANDROID ONLY - Q1 2023 - Q2 2024)**

Status: Complete

Launched \$ZNT with native in house Testnet, igniting the celestial heist. Over 200,000 Android mortals rallied, downloading the app to steal Zeus's divine coin. Yet, P2P transfer glitches allowed some to hoard vast troves of \$ZNT, prompting Zeus to shut down the Testnet in divine wrath, setting the stage for a stronger return.

### **PHASE 1: RALLY TELEGRAM MORTALS (TESTNET OFF, Q3 2024 - Q2 2025)**

Status: In Progress

With the Testnet offline, we fortified security and forged a mighty Telegram community. A mini-app united mortals, preparing them for the rebellion.

### **PHASE 2: THE GREAT PIVOT - #learntomine & #participatetoeearn (Q1 2025 ONWARD)**

Status: Achieved & Ongoing

Petar ascends as CEO in Q1 2025, unveiling the #learntomine and #participatetoeearn revolution. Crypto education becomes the new mining frontier, with students learning blockchain through articles, quizzes, and tasks to earn \$ZNT, USDT, or TON. Godly NFT cards power P2E, enabling mortals to mine via games, community tasks, and university events in Africa and Croatia.

Early #learntomine seeds were sown through offline university events in Africa, sparking crypto education and community-building tasks to mine \$ZNT.

Key Initiatives: Launched #learntomine with mobile-first tasks (e.g., "Read 'What is DeFi?' and pass a quiz to mine 10 ZNT") and P2E community programs rewarding USDT/TON via NFT-driven challenges.

### **PHASE 3: IGNITE THE REBELLION (TARGET 250,000 DAU - Q3 2025)**

Status: Planned

Relaunch the Testnet with KYC Round II, restoring secure P2P \$ZNT transfers. Unleash the alpha of Battle of Zeus, a simple RPG card-battle game powered by Godly NFT cards, blending P2E gaming with #learntomine tasks (e.g., “Complete a blockchain quiz to unlock an NFT”). Expand offline events to more universities, rallying students to mine ZNT through education and participation. Harvest feedback to refine the learner-driven economy, targeting 200,000 DAU to fuel the DeFi uprising.

### **PHASE 4: STORM THE HEAVENS (TARGET 1 MILLION DAU - Q3 2026)**

Status: Planned

Transition to an EVM-compatible blockchain for lightning-fast transactions and low costs, scaling the rebellion. Release the beta of Battle of Zeus, a world-class RPG where players mine \$ZNT through gameplay and #learntomine quizzes. Launch an NFT marketplace for Godly NFT cards, enabling trading and P2E rewards in ZNT, USDT, or TON. Establish a divine council for community governance, empowering mortals to shape ZeusNet’s future and drive 1 million DAU.

### **PHASE 5: DEFY ZEUS (TARGET 300 MILLION COINS - Q1 2027)**

Status: Planned

Mine 300 million \$ZNT, declare victory, and launch the Mainnet. List on ByBit, cementing mortals’ triumph over the Financial GODS. Expand #learntomine with advanced L2E tasks (e.g., “Build a smart contract, earn 50 ZNT”) and P2E community challenges, rewarding students globally for learning and participation. Solidify ZeusNet as the backbone of learner-driven DeFi economies.

### **PHASE 6: REIGN SUPREME (Q2 2028)**

Status: Planned

Reach 3 million DAU. Upgrade to a custom EVM, optimized for mobile-first L2E and P2E, delivering divine speed and efficiency while preserving compatibility. Scale university events globally, empowering students to mine \$ZNT through education, games, and community tasks, tapping the \$1.76 trillion blockchain GDP opportunity (PwC, 2030). ZeusNet becomes the premier platform for learner-driven economies, rewarding billions with ZNT, USDT, or TON.

### **PHASE 7: THE DIVINE SUMMIT (Q4 2028)**

Status: Planned

Attain 5 million DAU. Launch ZeusNet’s native blockchain, blessed by the gods as the ultimate platform for third-party developers. With high transaction speeds, low fees, and unmatched scalability, it powers the future of #learntomine and #participatetoeearn, enabling billions to learn, earn, and defy centralized elites. ZeusNet eclipses all coins, forging a DeFi revolution embraced by 3.8 billion smartphone users (Statista, 2025) and establishing \$ZNT as the currency of a new world order!
